Bringing the Outside World into the Classroom

A little bit about us...

PrimeVR uses Virtual Reality (VR) to open a pupil's imagination and bring learning to life. Taking pupils on school trips is a great way of learning but it's not always possible. We aim to fill this gap by giving pupils the opportunity to see places from all over the world.

How does it work?

Pupils will either share a VR headset or have their own. Using VR headsets (similar to binoculars) pupils will be able to see a 360° perspective of the place they are visiting, almost giving them the feeling of being there. For example, if pupils are learning about Ancient Egypt, we will be able to take them to see the Pyramids of Giza and the Great Sphinx.

What are the benefits?

VR gives pupils a different perspective. Not only does it help to inspire creative writing but it also gives pupils the chance to develop their knowledge. Each session will be led by a PrimeVR team member who will be sharing facts and asking questions. This is an interactive session and pupils will be encouraged to discuss what they've seen, ask questions and be curious!

Is it suitable for everyone?

VR is used in many different sectors, from education and entertainment through to healthcare and construction. We recommend that if your child has epilepsy or is prone to seizures they do not use the VR headsets. As an alternative, we are able to set up the devices so that they can be used in 2D mode. If you have any concerns, please don't hesitate to contact the email address below and we'll get back to you.

Want to find out more?

If you're interested in finding out more about VR in the classroom, feel free to visit our website <u>www.primevr.co.uk</u>. Here, you'll be able to watch a **video** demonstrating how it works in the classroom, check out **lesson plans** that can be used alongside VR and keep up to date with technology in the classroom through our **blog**.

If you have any concerns with your son/daughter participating in a VR session, please don't hesitate to contact us on <u>info@primevr.co.uk</u> and we'll be sure to answer any of your questions.
